Industry Day 2025 on coating technologies by the SWEB project

This year's INDUSTRY DAY 2025 will focus on practical issues, bringing together small and medium-sized business representatives (SME) from glass and other related industries to exchange expertise and gain a deeper understanding of the needs and challenges of this business segment.

Small Business & Science affaires

Are you an entrepreneur looking for new business opportunities? Thinking about niche products with high added value? Planning to obtain EU scientific grants for business development? Then you should definitely participate in INDUSTRY DAY 2025!

The most important task of INDUSTRY DAY 2025 is to obtain feedback that will help the SWEB project team better understand the specifics of the SME business environment in the Baltic region and the challenges for successful commercialization of the SWEB project.
